ance on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.(54) Title: PROGRAMMABLE REMOTE CONTROL AND METHOD FOR PROGRAMMING A PROGRAMMABLE REMOTE
CONTROL, A READABLE MEMORY AND A PROGRAM

(57) Abstract: A remote control comprises object keys and a selector for linking preset IR or RF code sets to the object keys. The remote control comprises: - a selector for the selection of an IR or RF preset code set by a user, - an activator for the activation of one or more links between an element of said preset IR or RF code set and an object key by the user after the selection, - a selector for the subsequent selection of a further preset code set by the user and - repeat means for repeating the steps a and b for the further preset code set until all object keys have been linked or the user terminates the process. This allows the user to combine more than one preset code set into a single code set.
